

VENDOR APPROVAL LETTER

September 17, 2014

Atech Turbine Components, Inc.
Thomas Young, Quality and Engineering Manager
1 St. Mark Street
Auburn, MA 01501

Dear: Mr. Young

The Horizon Air Maintenance Quality Assurance Department has recently completed a On-site Audit of your company's Component Repair/Overhaul policies, procedures, and capabilities.

The audit was found to be satisfactory. Your Company will be added to the Horizon Air Approved Vendor Master List with usage limitations noted below, if applicable.

Approved Capabilities:

As Specified on Air Agency Certificate

In accordance with the continuing analysis and surveillance (CAS) program requirements of the Horizon Air General Procedure Manual (GPM), continued listing is contingent upon satisfactory completion of on-going surveillance by the Horizon Air Maintenance Quality Assurance Department. Our surveillance procedures include on-site and/or mail survey.

Failure to satisfy the Horizon Air Maintenance Quality Assurance Department with a timely completion of the audit process, which includes responding with effective corrective actions, will result in removal of this Approved status.

Acceptance of this Approved Vendor Listing indicates that you will allow authorized Horizon Air and regulatory agency representatives engaged in on-going surveillance and investigations, access to your company Quality Management System, products and processes, and associated records when necessary. Reasonable access shall not be withheld.

In lieu of providing a copy of the GPM, your Company must use the following data when specified by FAA Regulation and Horizon Air contract, agreement, or repair/service/purchase order: Manufacturing design data, component maintenance manuals, Horizon supplied manuals, Horizon Engineering Orders/Build Specifications and other acceptable or approved data.

This approval letter serves as the closing action for the recent surveillance process and is good for a maximum of two (2) years from date of issue.

Thank you for your cooperation.

for

Wavell Mead
Horizon Air, Manager of Quality Assurance
